

November 2, 2009

Dear Parent/Guardian:

We apologize for this late notice, but we were notified very late last Friday afternoon that the H1N1 clinics scheduled tomorrow for PK, 2nd and 3rd grades will now also include the 4th grade. If you would like for your child to receive this vaccine, please return a signed consent form which was sent home earlier, with him/her tomorrow. If you need another consent form, it is posted on our website (www.capetigers.com).

Please remember that students who have taken antiviral medications (Tamiflu) within 48 hours should report this on the consent form. Flu antiviral drugs taken from 48 hours before through 2 weeks after getting LAIV (intranasal) can lower or prevent the vaccinated person from responding to the vaccine, and the person may not get adequate immune protection from the vaccine. Antiviral drugs can be taken with the inactivated (shot) vaccine.

Again, our apologies for the short notice.

Sincerely,

Deena Ring
