

ATTENTION

High School Graduates

(And Rising Seniors) Ages 17-24

You are invited to learn about the exciting world of Geospatial Intelligence – and the many thousand jobs and rewarding careers available!

If you are a high school graduate or rising senior between 17 and 24 years of age, you have the opportunity to learn and be trained in the basic skills of Geospatial Intelligence. This training will qualify you for one of the many jobs that are coming to our part of the world as a result of the new western headquarters of the National Geospatial Intelligence Agency being located in St. Louis.

THESE OPPORTUNITIES ARE WELL WITHIN YOUR REACH!

- You don't have to be a scientist – just have a general understanding of math, know how to use a computer, be willing to learn – and commit to 12 weeks of training!
- If you're interested in national security or the future of agriculture, healthcare, energy and natural resources you are already interested in Geospatial Intelligence!

Beginning June 15, you can register for a 12-week session meeting two hours per day, four days per week at the Cape Girardeau Career and Technology Center. Graduates will qualify for paid apprenticeships in your hometown!

ATTEND A FREE SHORT INFORMATION AND Q&A SESSION MONDAY, JUNE 8.

SIKESTON – 11am

Alan Wire | 1500 W. Malone

CAPE GIRARDEAU – 1pm

Career & Technology Center | 1080 S. Silver Springs Rd.

Please join us - bring a friend, your parents or a trusted advisor - we are here to help, and we believe in you!
